

**C. & A. ELEVEN AND ARIZONA GUARDS TO PLAY AT PARK TODAY**

The C. & A. football squad will play the Arizona guards at the Warren park this afternoon at 2:30. The Arizonans are expected to bring in a number of crack Indian players and whirlwind exhibition is expected. The C. & A. have a real team, having defeated the First Cavalry last week 27 to 0, and will likely be strengthened this afternoon by the services of John Galt in the back field, one of the fastest big men in football togs in Arizona.

The game will begin at 2:30. Admission is 25 cents.

**CARLTON SHUTS OUT U. OF CHI—WHAT SCORE?**

CHICAGO, Oct. 7.—Carelton College of Northfield, Minn., shut out the University of Chicago for the foot ball team today. Chicago was outpointed in the first half, but when the game ended were playing strong. The Chicago line did not hold and Carelton was able to break up most of its plays. The Minnesota men were deadly in the forward passing.

**PRINCETON SHUTS OUT NORTH CAROLINA 29 TO 0**

PRINCETON, N. J., Oct. 7.—Princeton defeated the University of North Carolina football team here today 29 to 0. After Princeton had run up a safe number of points on the southern eleven, Coach Russ, of Princeton sent in a string of substitutes.

**FORMER BISBEE MAN WILL SUPERINTEND DRILLING AT MIAMI**

**E. R. Rice, One Time Head of Efficiency Department of C. Q., to Handle Drilling of Inspiration Needles.**

GLOBE, Ariz., Oct. 7.—E. R. Rice, for four years efficiency engineer for the Copper Queen and the man who drilled the Miami Southwestern for Paine-Webber interests, has been engaged to superintend drilling operations at the Inspiration Needles Copper Company's property. This was the announcement made by John S. Cook, secretary of the Company, yesterday when he completed negotiations that have been going on for the last two weeks. The company had several men in view for the position but were determined to secure a superintendent without regard to price, who is best equipped for the work in hand. Mr. Rice is considered the man as his knowledge of the Miami Copper belt, on which both the Inspiration Needles and Miami Southwestern are situated, has been gained at first hand.

Mr. Rice is a graduate of the Michigan School of Mines and is a member of the American Institute of Mining Engineers. His record shows him to be thoroughly familiar with drilling operations on such a property as the Inspiration Needles and it is anticipated that under his direction progress on the property will go ahead at a rapid pace.

When the new superintendent comes here this week to take charge of the property he will bring with him an expert assayer whose knowledge of ores of the character found on the Inspiration Needles has been gained through extensive experience. The assay office at the property has been completed and there is nothing to cause any delay in the progress of development work.

That sulphides in a large body will be encountered in Hole No. 1 on the Needles within a very short time is the opinion of mining men who have been watching developments there. Patches of sulphides have already been watching developments there. Patches of sulphides have already been encountered in several places and the drillers and engineers believe that the drill is now close to the main ore body. Discovery of sulphides in Hole No. 1 will be looked upon as practically proving the mine.

Conditions in Hole No. 2 are likewise most encouraging. The hole is being driven through oxidized ore that gives the richest promise and it is anticipated that the sulphides will be encountered here also at depth.

When Mr. Rice drilled the Miami Southwestern it was for the Paine-Webber people of Boston. His drilling developed an ore body of approximately 12,000,000 tons of ore. The Miami Southwestern, and the Inspiration Consolidated Copper Company both adjoin the Inspiration Needles and geological conditions indicate that the ore bodies of both these properties continue into Needles ground.

**SHE WILL ORGANIZE G. O. P. WOMEN IN THE WARREN DISTRICT**

MISS HANNAH C. EGELSTON

Women voters of the Warren District will have themselves to blame if they fail to take advantage of their suffrage right at the forthcoming election. Miss Hannah C. Egelston, chairman of the Woman's Bureau, Republican State Central Committee arrived in Bisbee yesterday to perfect a local organization. The object is to get out a full vote on election day.

The first meeting will be held tomorrow at 3 p. m. in Republican headquarters in the Muhelm Building on Brewery Gulch. Appointments will be made from women residents of the Warren District for chairman, secretary and members of the standing committees. Dates will be assigned for regular meetings at which speakers will give instruction in voting and issues will be discussed. It is believed that Warren District women will enter heartily into the work of the organization. This year women will have their first opportunity to take active part in a presidential election. The importance of their playing an important role in the State campaign will be emphasized. Miss Egelston has met with splendid success in organizing local clubs in Maricopa, Gila and Graham counties. She feels confident that Cochise will prove to be no less alert in securing a big vote from the women this fall.

**Compare These Suits With Those**

other tailors ask \$25 for. We guarantee that you cannot duplicate them unless you pay \$10 to \$15 more than our price.

**A Real \$25 Suit Made to Your Measure**

**\$15**

NO LESS THAN \$15—NO MORE THAN \$20

Our low price is made possible because of the combined sales of over 5000 dealers whose sole aim is to give their customers more for their money than they can possibly get elsewhere. These suits are made by thoroughly competent tailors and we guarantee them to be entirely satisfactory in every respect.

MASSACHUSETTS FIELD ARTILLERY ENDS HIKE  
(By Review Leased Wire)  
EL PASO, Oct. 7.—The second battalion of the Massachusetts field artillery will return from the practice hike to Las Cruces on Monday to complete its target practice on the range before returning home. The battalion will spend one week on the range. Troop A of the Massachusetts cavalry is also expected back from the practice march Monday to prepare for its return home.

**TOVREA PRAISES THE PINAL DEVELOPMENT**  
Local Man, Director in Company, Returns from Trip to Property Near Ray.

E. A. Tovrea, Bisbee business man, has just returned from Pinal county where he inspected the progress being made at the property of the Pinal Development Company and which he declares is more than satisfactory from every standpoint. Tovrea returns more optimistic than ever of the possibilities of the property.

Good results are being had in the main tunnel. Two shifts are working steadily. The face of the working is now in quartzite, which formation underlays the ore strata and forms the footwall of the vein. It will be necessary to pass through this quartzite which will require driving of approximately 200 feet before the ore zone is reached.

Some copper is visible now, according to Tovrea, in the quartzite whenever the formation is fractured to any extent. Nothing of importance, in the way of a find is anticipated until the tunnel reaches the contact.

"Present showings would indicate," said Tovrea, "that Pinal Development with its numerous good showings and the substantial development now in progress will eventually become a real, big mine. As regards the company itself it is gratifying to know that financially it is in excellent condition and that the management is proceeding with the work with economy and apparent good judgement."

**COAST RESULTS**  
At Los Angeles—  
First game— R. H. E.

**BIG STUDEBAKER TO BE GIVEN AWAY BY EAGLES AT BAZAAR**

Advance Plans of F. O. E. Include Several Other Features for Their Show Beginning November 20.

The week of November 20 has been designated by the bazaar committee of the Fraternal Order of Eagles to dedicate their building on Main St., which is being rapidly pushed to completion by a large force of builders. Already much work, in preparation for the week's big affair, is being done by the committee and by the individual members of the local lodge.

Work has been going on upon the F. O. E. structure for several weeks. Owing to a delay in receiving the steel and the brick progress was slow for a time. Now, however, it is being rushed and the contractors declare it can be finished in ample time to afford the Eagles a big opening occasion.

Besides the usual bazaar attractions the program will include several features extraordinary. The committee is now carefully investigating the merits of several offerings and the public is assured of an excellent show during the entire week.

The best product of the Studebaker Corporation's gigantic factory, a big six cylinder machine, will be one of the gifts of the Eagles during the week to one of the bazaar's patrons. The car has already been purchased from the Bisbee Auto Company, which company announces that the regular service which goes with every purchased Studebaker will go to the person who receives the Eagles' gift.

Several other articles of value will also be given away during the week of bazaar and revelry.
